

Our recommendation:
100% pure and natural essential oil blends

Joyful Journeys

invigorating • tangy, fruity • Grapefruit, Douglas Fir, Lemongrass and more

Clean Air

clarifying • fresh, tangy • Peppermint, Lemon, Myrtle and more

Relax

relaxing • floral, soothing • Lavender, Benzoin Resinoid, Ho Leaves and more

Happiness

mood-lifting • light-hearted • Mandarin, Grapefruit, Tonka and more

Good Mood

motivating • fruity, exotic • Orange, Lime, Lemon and more

Heartwarming

harmonizing • rosy, warm • Rose, Vanilla, Sandalwood and more

In Balance

balancing • floral, soft • Orange, Rose, Rose Geranium and more

Concentration

promotes concentration • fruity, sharp, clean • Lemon, Giant Fir, Sage and more

Let Go

calming • soft, herbal • Ho Leaves, Lavender, Iris and more

Joy of Life

cheering • zesty, fruity, Grapefruit, Spearmint, Lime and more

Summer Sun

uplifting • fruity, warm • Orange, Green Mandarin, Neroli and more

Yoga Flow

For mindful breathing • clean, fruity, gentle • Myrtle, Grapefruit, Sandalwood and more

Please do not use any viscous essential oils such as Benzoin Resinoid, Myrrh, Vanilla, Vetiver, Bourbon Vetiver or Frankincense, as these will clog up and damage the fountain pump.

Safety Advice for the Use of Essential Oils and Blends

Please read the enclosed instructions carefully, along with the information on the label for the essential oils and blends you are using.

Disposal

Please do not dispose of this fragrance device in your general household waste. Instead, please take it to an appropriate recycling collection point. These collection points are regulated according to 2002/96/EC and 2006/66/EC, subject to the country and legislation.

We reserve the right to make technical changes to the fragrance device as well as changes to the contents of these instructions.

Manufacturer of the fountain pump:
EDEN Srl
Via delle industrie, 16
36050 Cartigliano (VI) – ITALY

PRIMAVERA®

Aroma Fountain

Important Information About Usage and Cleaning

EN November 2020

Dear Customer,

Many thanks for choosing the PRIMAVERA Rondo Aroma Fountain.

To enjoy this high-quality aroma fountain as long as possible, we ask you to please read the enclosed instructions carefully and pay close attention to all the safety advice.

We wish you a lot of joy and many fragrant hours with your new Aroma Fountain.

Fragrant greetings from the Allgäu.
Your PRIMAVERA Team

Aroma fountains

- create a soothing air humidification
- refresh and purify the atmosphere
- increase your personal well-being
- are an enrichment and eye-catcher for any living space
- the soft splashing sound has a harmonizing effect on the body, mind and soul

Scope of delivery

- Ceramic water bowl, glazed inside and out
- Ceramic source sphere, glazed on the outside
- Submersible water pump
- Connecting hose
- Instruction manual for fountain and pump

Important information

Before operating the aroma fountain, please carefully read the operating instructions for the aroma fountain and the pump. Keep both instructions in a safe place. In particular the safety instructions for the pump are to be observed exactly.

The aroma fountain should be emptied and cleaned daily after use. Please allow all parts to dry completely before operating the fountain again.

Operating instructions

- Fill three quarters of the fountain bowl with water. It is best to use filtered, distilled or low lime content water. This protects the fountain and the pump.
- Please make sure to set up the fountain on a non-slip, tilt-resistant and waterproof surface.
- Please keep out of reach of children and disoriented persons.
- Do not leave the aroma fountain unattended while in operation!
- Insert the connecting hose through the upper outlet of the top part of the fountain until both edges close evenly. To do this, moisten the connecting hose with some water.
- Then insert the fountain pump nozzle into the connecting hose from below.
- By rotating the pump nozzle you can regulate the effervescence of the fountain.
- Proceed to center the upper part of the fountain along with the pump on top of the bowl. The connecting hose should not protrude from the source sphere opening at the top.
- Only then insert the power plug of the pump into the socket [230 volts]. If you encounter startup problems, please unplug the device and add some water from above, through the source sphere. Then insert the power plug into the socket again.
- Please make sure to never insert or remove the power plug from the outlet with wet hands!
- Now you can add your desired essential oil blend into the bowl or onto the source sphere of the fountain. Please use no more than 5 -10 drops of a 100% pure and natural essential oil blend, depending on the desired intensity.

More notes and tips

- The pump's performance and the associated effervescence can be regulated by rotating the pump nozzle.
- Please refill with water regularly so that the entire pump is submerged in water.
- Clean your fountain regularly, at least weekly and when you do, fill it with fresh water.
- Always disconnect the power plug from the socket when cleaning the fountain.
- The pump is designed for continuous operation.

Thorough care and maintenance of your aroma fountain is important. Diligent care is worthwhile!

We recommend cleaning your fountain regularly. This way you will be able to enjoy it for a long time.

The frequency of complete cleaning depends on:

- the lime content of your water
- the essential oil blends used

Please perform a complete cleaning every week!

Before you begin cleaning, always disconnect the power plug from the socket! Then start by rinsing the individual parts with a mild dishwashing liquid.

Fill with fresh, warm water at about 68 degrees F/20 degrees Celcius adding a generous shot of vinegar essence or 1 tbsp of citric acid and let the fountain run for several hours. Once the cleaning cycle is completed, the pump and the fountain must be rinsed thoroughly. **Then leave all the parts to dry completely.**

If you desire to change the fragrance it is recommended to perform a complete cleaning beforehand.

Cleaning of the pump in case of heavy limescale or contamination.

- Disconnect the power plug from the socket.
- Remove the pump and pull off connecting hose.
- Pre-clean all parts with a mild dishwashing liquid.
- Remove the side cover with its mesh by pressing against the pump nozzle.
- Insert a thin screwdriver into the small indentation next to the rotor; this allows you to pull the rotor out.
- If there are oil residues, briefly immerse all parts in rubbing alcohol or clean each part by using rubbing alcohol and a small brush.
- In the event of limescale residues, clean all parts by briefly immersing them in water and vinegar essence or in 1 tbsp of citric acid.
- After cleaning, please reinsert the rotor. The rotor must now toggle back and forth in the rotation direction when it is manually given a slight push. If this does not happen, the internal pin within the pump and the pin guide in the rotor must be cleaned again. Finally, assemble all pump parts completely and conduct a test run in the water.
